

LVAD Complications Case Reports

Left ventricular assist devices (LVADs) have transformed the management of advanced heart failure by providing mechanical circulatory support as bridge-to-transplant, bridge-to-recovery, or destination therapy. However, LVAD therapy is associated with a wide range of clinically significant complications that require prompt recognition and specialized management. **Case Reports and Case Series in Cardiology Journal** welcomes submissions of **LVAD complications case reports and case series** that highlight rare presentations, device-related adverse events, and management outcomes.

This dedicated section focuses on clinically important complications related to **device function, thromboembolic events, infection, bleeding, and hemodynamic instability**. Published reports support cardiologists, heart failure specialists, intensivists, and cardiothoracic teams with practical case-based learning. Recent case literature specifically highlights unusual complications such as **aortic regurgitation, pump cable damage, display failure, recurrent bacteremia, and ventricular arrhythmias**.

We invite manuscripts covering:

- Pump thrombosis case reports
- Driveline infection and bacteremia
- LVAD-associated bleeding complications
- Gastrointestinal bleeding cases
- Ischemic and hemorrhagic stroke
- Right ventricular failure after LVAD
- Device malfunction and alarm failure
- Aortic regurgitation after LVAD
- Ventricular arrhythmia case reports
- Pump exchange and replacement cases
- Rare mechanical complications
- Long-term follow-up case series

At **Case Reports and Case Series in Cardiology Journal**, we encourage authors to submit rare, educational, and outcome-based LVAD complication cases that improve clinical decision-making and patient safety.

Why Publish With Us?

- Rapid peer-review process
- DOI allocation for every article
- International editorial support
- Global visibility
- Ideal platform for advanced heart failure device case reports

Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission

Portal: <https://www.casereportsincardiology.org/submit.html> (or) also invited to submit through the Journal

E-mail Id: editor@casereportsincardiology.org.
