

## Heart Failure | Case Reports and Case Series in Cardiology Journal

Heart failure is a major global cardiovascular condition associated with significant morbidity and mortality. **Case Reports and Case Series in Cardiology Journal** invites the submission of high-quality **heart failure case reports and case series** that provide valuable clinical insights, rare presentations, and evidence-based management strategies.

This dedicated section publishes clinically significant reports related to **acute and chronic heart failure, cardiomyopathies**, and advanced therapeutic interventions. The aim is to support cardiologists, physicians, researchers, and healthcare professionals with practical, case-based learning and updated clinical experiences.

We welcome manuscripts on:

- Acute decompensated heart failure
- Congestive heart failure
- Heart failure with reduced ejection fraction (HFrEF)
- Heart failure with preserved ejection fraction (HFpEF)
- Dilated and hypertrophic cardiomyopathy
- Ischemic heart failure cases
- Drug-induced cardiomyopathy and heart failure
- Valvular heart disease with heart failure
- Device therapy (CRT, ICD, LVAD)
- Advanced heart failure interventions
- Rare and complex diagnostic cases
- Long-term follow-up case series

At **Case Reports and Case Series in Cardiology Journal**, we encourage authors to submit rare, educational, and outcome-focused clinical cases that contribute to better diagnosis, management, and treatment outcomes for heart failure patients.

### Why Publish With Us?

- Rapid peer-review process
- DOI allocation for every article
- International editorial support
- Global visibility
- Ideal platform for rare and educational cardiology cases

### Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission

Portal: <https://www.casereportsincardiology.org/submit.html> (or) also invited to submit through the Journal

E-mail Id: [editor@casereportsincardiology.org](mailto:editor@casereportsincardiology.org).
