

## **Cardiogenic Shock Management Case Reports**

Cardiogenic shock remains one of the most challenging and high-risk conditions in cardiovascular medicine, requiring rapid diagnosis, multidisciplinary coordination, and advanced therapeutic strategies. Despite advancements in critical care and interventional cardiology, managing cardiogenic shock continues to demand real-world insights and clinical expertise.

At **Case Reports and Case Series in Cardiology Journal**, we invite clinicians, intensivists, and cardiologists to share their experience in managing cardiogenic shock through detailed case reports and case series.

### **Why This Topic Matters**

Each case of cardiogenic shock presents unique clinical challenges—from early recognition to complex decision-making in hemodynamic support. Sharing these experiences can:

- Improve early diagnosis and risk stratification
- Guide the use of mechanical circulatory support devices
- Enhance understanding of treatment strategies
- Contribute to better survival and patient outcomes

### **Focus Areas for Submission**

We encourage submissions highlighting:

- Acute myocardial infarction-related cardiogenic shock
- Mechanical circulatory support (IABP, Impella, ECMO)
- Pharmacological management (vasopressors, inotropes)
- Hemodynamic monitoring and ICU care
- Complex or refractory cardiogenic shock cases
- Innovative or multidisciplinary treatment approaches

### **Types of Cases We Welcome**

- Rare or challenging cardiogenic shock cases
- Case series on management strategies and outcomes
- Device-based intervention case reports
- Critical care and emergency cardiology cases

### **Join Our Global Community of Authors**

By publishing in **Case Reports and Case Series in Cardiology Journal**, you contribute to advancing knowledge in one of the most critical areas of cardiology and help clinicians worldwide improve patient care.

### **Why Publish With Us**

- Rapid and efficient peer review
- Global visibility and indexing support
- Dedicated cardiology case reports platform

- Strong SEO reach for your published work

### **Manuscript Submission**

Authors are requested to submit their manuscript by using Online Manuscript Submission

Portal: <https://www.casereportsincardiology.org/submit.html> (or) also invited to submit through the Journal
