

Acute Decompensated Heart Failure Case Reports | Case Reports and Case Series in Cardiology Journal

Acute decompensated heart failure (ADHF) is a serious and frequently encountered cardiovascular emergency characterized by the sudden or gradual worsening of heart failure symptoms, often requiring urgent hospitalization and advanced medical management. **Case Reports and Case Series in Cardiology Journal** welcomes the submission of **acute decompensated heart failure case reports and case series** that provide important clinical insights, rare presentations, diagnostic challenges, and treatment outcomes.

This dedicated page focuses on clinically significant cases involving **acute worsening of chronic heart failure, new-onset acute heart failure**, and complex decompensation scenarios requiring immediate intervention. Published reports aim to support cardiologists, emergency physicians, intensivists, and researchers through practical, case-based learning.

We invite manuscripts covering:

- Acute decompensated chronic heart failure
- New-onset acute heart failure
- Pulmonary edema due to heart failure
- Cardiogenic shock associated with ADHF
- Acute fluid overload and congestion
- Acute systolic and diastolic heart failure episodes
- ICU and emergency management case reports
- Inotropic and vasodilator therapy cases
- Mechanical circulatory support in ADHF
- Complex comorbid presentations
- Rare triggers and precipitating factors
- Long-term follow-up and outcome-based case series

At **Case Reports and Case Series in Cardiology Journal**, we encourage the publication of rare, educational, and clinically challenging ADHF cases that contribute to improving emergency diagnosis and management strategies.

Why Publish With Us?

- Rapid peer-review process
- DOI allocation for every article
- International editorial support
- Global visibility
- Ideal platform for emergency cardiology case reports

Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission

Portal: <https://www.casereportsincardiology.org/submit.html> (or) also invited to submit through the Journal
