

Cardiology Case Series

Cardiology case series provide valuable insights into patterns of disease, treatment outcomes, and clinical decision-making across multiple patients. Unlike single case reports, case series allow clinicians to identify trends, compare management strategies, and contribute more robust evidence to cardiovascular medicine.

At **Case Reports and Case Series in Cardiology Journal**, we invite clinicians, cardiologists, and researchers to submit high-quality cardiology case series that enhance understanding of cardiovascular diseases and interventions.

Why Case Series Matter

Case series play a critical role in bridging the gap between individual case reports and large clinical studies. They help to:

- Identify trends in disease presentation and progression
- Evaluate treatment strategies across multiple patients
- Highlight outcomes and complications
- Support evidence-based clinical practice

Focus Areas for Submission

We welcome case series covering:

- Coronary artery disease and interventions
- Structural heart disease and procedures
- Heart failure and cardiomyopathies
- Cardiac imaging and diagnostics
- Electrophysiology and arrhythmias
- Rare and complex cardiovascular conditions

Types of Submissions

- Clinical case series with detailed patient data
- Procedure-based case series (PCI, TAVR, etc.)
- Imaging-based case series
- Outcome and follow-up studies

Join Our Global Community of Authors

Publishing in **Case Reports and Case Series in Cardiology Journal** allows you to share meaningful clinical data with a global audience and contribute to advancing cardiology research and practice.

Why Publish With Us

- Rapid and efficient peer review
- Global visibility and indexing support
- Dedicated cardiology-focused platform
- Strong SEO reach for published work

Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission

Portal: <https://www.casereportsincardiology.org/submit.html> (or) also invited to submit through the Journal E-mail
